No. 249.

NEW SOUTH WALES, AUSTRALIA

STATISTICAL BULLETIN

JUNE QUARTER, 1938.

(ISSUED AUGUST, 1938.)

COMPILED FROM OFFICIAL RETURNS

S. R. CARVER.

GOVERNMENT STATISTICIAN.

PUBLISHED BY AUTHORITY OF

THE GOVERNMENT OF NEW SOUTH WALES.

Wholly set up and printed in Australia, by
David Harold Paisley, Government Printer, New South Wales.

1938.

[18.]

NOTE.

The Statistics contained in this Bulletin are the latest available at the time of publication. In some cases the figures are preliminary only, and subject to alteration in a later issue.

For complete information regarding New South Wales, reference should be made to "The Official Year Book of New South Wales" or to the "Statistical Register of New South Wales."

A digest of statistical trends as disclosing economic conditions in New South Wales is issued about 24th of each month under the title, "Monthly Summary of Business Statistics."

Particulars of the above publications are shown on the inside front cover of this Bulletin.

Total		132,562	143,045	157,623	176,399	14,983		3,302	3,298	3,643	3,254	3,394	

Note.—Wholesalers trading only in exempt goods do not supply returns. Considerable numbers of commodities were exempt from tax in July, 1931, September, 1932, October, 1933, August, 1934, October, 1935, and September, 1936. Consequently the proportion of wholesale trade covered by the records has been progressively reduced. The amount of sales for individual months includes some sales effected in previous months.

* Tax collected mainly upon sales in the month shown, but actually received in the following month. The rate of tax was 2½% from 1st August, 1930, 6% from 11th July, 1931, 5% from 26th October, 1933, and and 4% from 11th September, 1936.

Note.—This index represents the ratio of monthly clearings to the average for the months concerned during the five years 1926-1939. Seasonal fluctuations are, therefore, virtually eliminated. The trend has been smoothed out by taking a three months moving average. The index is adjusted to eliminate the effects of Treasury Bills and other special transactions on behalf of Governments, and the effects of bank amalgamations. No allowance has been made for normal growth or change of price levels.

A ludey not avertainable on account of suspension of State Covernment, banking transactions.

Index not ascertainable on account of suspension of State Government banking transactions.

No. 54.—Stock Exchange Index (Sydney).

The following index of the values of the principal Company shares on Sydney Stock Exchange embraces the ordinary shares of companies (excluding banking companies) whose business is conducted wholly or largely in New South Wales. The prices of individual shares are unweighted. There is no base period as the index represents the ratio of the average prices of ordinary shares to their par values; adjustment being made where capital is written off or bonus shares issued.

^{*} Census of 30th June.

NOTES.

- (1) The index of employment is the ratio of number in employment (first column of Table 57) to estimated number of wage earners available for employment. The index of unemployment is the residue, but both indexes are derived by modifying the census ratios in accordance with subsequent changes.
- (2) "Number in employment" is virtually a direct record; "number of available wage earners" is an estimate derived by increasing the total of wage earners in employment (plus unemployed) at the Census of 1933 in ratio to the annual increase in persons aged 15 to 64 years. In order to increase the degree of precision in the index, adjustment is made in the number of available wage earners thus estimated to allow for (a) increase in the proportion of females who are wage earners (b) youths who were without occupation but were not recorded in the wage-earning group at the Census of 1933. Adjustment for seasonal variations in employment is not made except in respect of casual retail employees in December.
- (3) At the census of 1933, 15,142 persons, or 1·8 per cent. of total dependent on employment were unemployed by reason of illness, accident, etc., or voluntarily. These are excluded from the above indexes which relate to percentages of available wage earners employed and unemployed.
- (4) The percentages of unemployment shown above are approximations relating to all wage earners of both sexes. Separate estimates for males and females cannot be made from the data available. It is known, however, that there is relatively little unemployment among females; unemployment among males is probably between 1 per cent. and 1.5 per cent. greater than the ratio shown above for both sexes combined.

No. 56.—Volume of Employment in Factories—New South Wales.

^{*} Prior to October, 1937, the living wages for awards and agreements under State jurisdiction were determined by the Industrial Commission of New South Wales. Since October, 1937, the basic wages of the Commonwealth Court of Conciliation and Arbitration have been adopted for State awards.

Note.—Current Living Wage rates of State Tribunals in other States in July, 1938, were:—Brisbane, 81s. Adelaide, 74s.; Perth, 80s. In Melbourne and Hobart the Federal basic rates (as shown in footnote to Table 59) are usually applied.

No. 59.—Basic Wage (Predominant Rate) in Federal Awards—Sydney.

*From July, 1937. † From October, 1937.

The rates in the other capital cities from 1st September, 1938, were:—Melbourne, 78s.; Brisbane, 75s.;

The rates in the other capital cities from 1st September, 1938, were:—Melbourne, 78s.; Brisbane, 75s.; Adelaide 76s.; Perth, 76s.; Hobart, 76s.

Note.—The foregoing rates up to February, 1934, represent the Harvester Wage (42s. in 1907) adjusted by retail price index numbers, plus the "Powers' 3s." From February, 1931, to February, 1934, the adjusted rate was reduced by 10 per cent. This reduction has been applied in calculating the rates shown above.

As from May, 1934, a new basic rate was determined, the "Power's 3s." abolished, and the 10 per cent. reduction restored to marginal rates. The basic rate is subject to periodical adjustment from June, 1934.

In July, 1937, a fixed loading of 6s. was added to the basic rate in two instalments, viz., 3s. from 1st July, 1937 and 3s. from 1st October, 1937.

^{**} Includes Ships' Stores exported oversea.

[‡] Year ended 30th June.

[§] Figures for 1931 and 1937 exclude articles posted or messages telegraphed in other states of Australia and received in New South Wales. On this account the figures cannot be compared with those for earlier years.

Note—The exports in 1921, 1931 and 1937 include articles produced in other States of Australia. Since 1st January, 1912, the Commonwealth Customs Department has classified all goods produced in the Commonwealth simply as "Australian," without distinguishing, as formerly, the particular State where they were produced.
